

56. (previously presented) The system of claim 71, wherein said first proxy server is also programmed to register the request in a logfile of all web sites requested by a user.

57. (previously presented) The system of claim 41, wherein said first proxy server is also programmed to register the request in a logfile of all web sites requested by a user.

58. (previously presented) The system of claim 46, wherein said first proxy server is also programmed to register the request in a logfile of all web sites requested by a user.

59. (currently amended) The system of claim 24, wherein the first proxy server is programmed to check the identity of a user who logs into the first proxy server and who presents a unique authentication credential prior to checking the identity of the requesting client and/or requested URL against the list or lists.

60. (previously presented) The system of claim 59, wherein the first proxy server is programmed, upon a successful authentication of the user's credential, to use a configuration of the user's account to check the identity of the requesting client and/or requested URL against the list or lists.

61. (previously presented) The system of claim 59, wherein the first proxy server is programmed that if said first proxy server fails to authenticate the user, then the first proxy server offers that user an opportunity to log in as an anonymous guest user.

07/60/010

log in as an anonymous guest user.

71. (currently amended) The system of claim 10 5, wherein inbound communications are arranged so that an actual location of an important resource is located in an unpublished location that is a replacement location to which requests rejected by the first proxy server are rerouted, wherein ~~approved~~ clients of approved users are not listed in the first proxy server in the friendly inbound list and are sent by the first proxy server to the replacement location, and wherein ~~unapproved~~ clients of unapproved users are listed in the friendly inbound list and have their request sent to a published address that contains unimportant information.

72. (currently amended) The system of claim 71, wherein a third proxy server and/or additional proxy servers forward inbound requests for resources to ~~other~~ proxy servers other than the first and second proxy servers.

73. (currently amended) The system of claim 71, wherein a third proxy server and/or additional proxy servers forward the outbound requests for access to web sites to ~~other~~ proxy servers other than the first and second proxy servers.

74. (previously presented) The system of claim 71, wherein the first proxy server is programmed to check the identity of a user who logs into the first proxy server and who presents a unique authentication credential against a valid user account prior to checking the identity of the requesting client and/or requested URL against the list or
